

RE-ORIENTASI ARAH PENGEMBANGAN PAKAN: SUMBER ENERGI DAN PROTEIN

Ali Agus*

Keynote Speaker

Universitas Gadjah Mada, Yogyakarta

*Corresponding author email: aliagus9@gmail.com

UNIVERSITAS GADJAH MADA

**Re-orientasi arah
pengembangan pakan :
Sumber energi & protein**

Ali Agus
Faculty of Animal Science, UGM

Purwokerto, 7 Juli 2017

Locally Raised, Globally Respected www.ugm.ac.id

Prof. Dr. Ir. Ali Agus, DAA., DEA,
Born : 9 ora, 22 Agustus 1950
Status : Married + 3 anak

Education :

01 (Dr.) Univ. of Animal Science UGM 1989
01 (DAA), ENSA Rennes France, 1985
02 (DEA), ENSA Rennes France, 1985
03 (Dr.) LIRSA Rennes France, 1986

Professional Experiences :

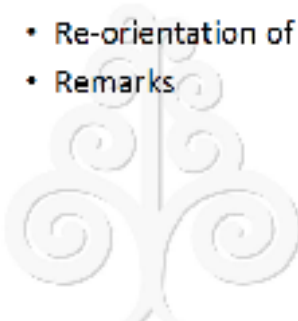

Lecturer - Faculty of Animal Science UGM 1980 - Now
Executive Director Small and Medium Enterprises Development Centre
(SMEDC) UGM, 2001-2008
General Secretary of South East Asia Network of Animal Science
(SEANAS) 2009 - Now
Consultant in Feedmill and Feedlot, Jakarta, 2000 - Now
Dean, Faculty of Animal Science UGM 2012-2016 - 2019 - 2021
President Indonesian Society of Animal Science (IAS) 2014-2018
Chairman of AINI 2007 - 2011, 2011 - 2016
Chairman of Indonesian Society of Animal Science, 2014-Now

Residence : Farm Daya Farm 12-5
Jl. Kalijasa Km 8,5 Yogyakarta
Tel. : 0274-880477, HP. 08164298120

Agenda

- Introduction
- Global feed production and ingredients
- Re-orientation of feed development
- Remarks

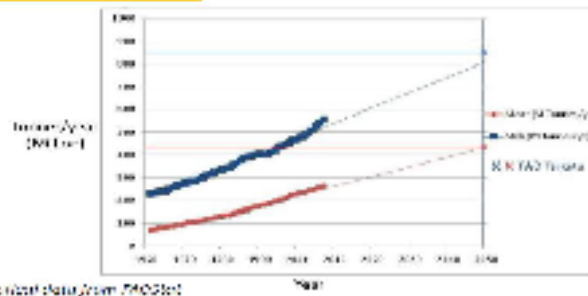

Locally Sourced, Globally Respected

www.upm.ac.id

INTRODUCTION

Predictions are in line with past growth

Global milk demand 2060: 841 Mt/yr
 Global meat demand 2060: 450 Mt/yr

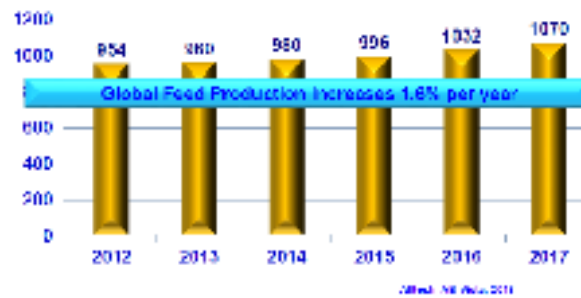

Locally Sourced, Globally Respected

www.upm.ac.id

GLOBAL FEED AND INGREDIENTS

Commercial Feed Production (mmT)

Locally Sourced, Globally Respected

www.upm.ac.id

China is largest producer (mmT)

Locally Produced, Globally Respected www.upm.ac.id

Most commercial feed for poultry

Locally Produced, Globally Respected www.upm.ac.id

Feed Ingredients

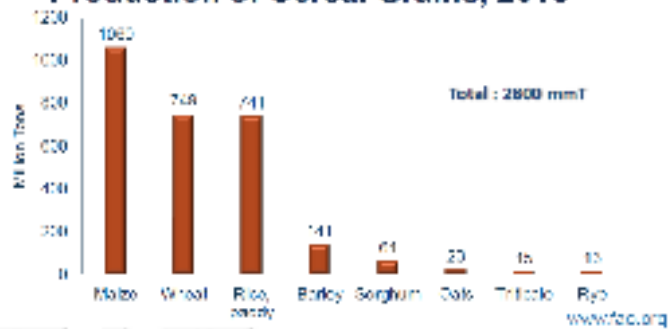

Sumber Energi : Diambil dari by product nya
Sumber Protein : Diambil dari by product nya

Locally Produced, Globally Respected www.upm.ac.id

Production of Cereal Grains, 2016

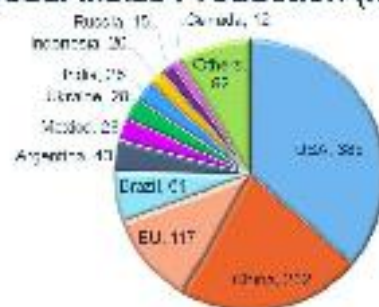

Locally Based, Globally Respected

www.ugm.ac.id

Global Maize Production (mT), 2016

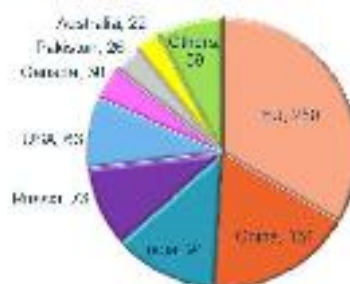

Locally Based, Globally Respected

www.ugm.ac.id

Global Wheat Production (mT), 2016

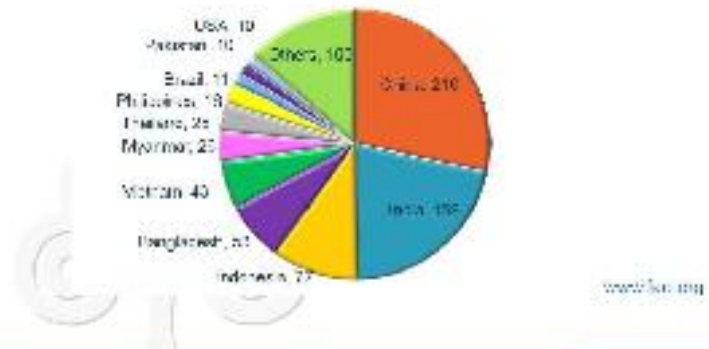

Locally Based, Globally Respected

www.ugm.ac.id

Global Rice Production (mT), 2016

Locally Rooted, Globally Respected www.ugm.ac.id

Cereal Co-products

Maize	Wheat	Sorghum
DDGS	DDGS	DDGS
Corn gluten feed	Middings	
Corn gluten meal	Shorts	
Hominy feed	Milium	
Corn germ meal	Red dog	
	Bran	

Locally Rooted, Globally Respected www.ugm.ac.id

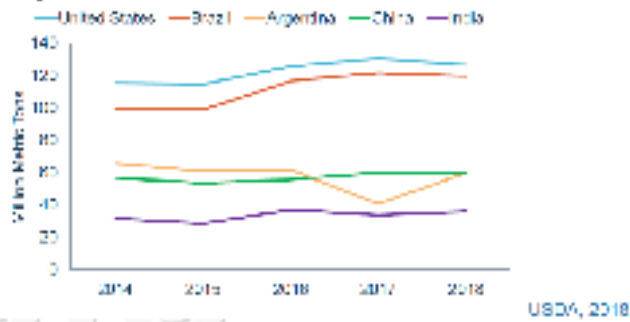

Global Oilseed Production, 2017 (Million mT per year)

Locally Rooted, Globally Respected www.ugm.ac.id

Major Oilseed Producers 2014-2018

Locally Rooted, Globally Respected

www.ugm.ac.id

Soybean Production 2014-2018

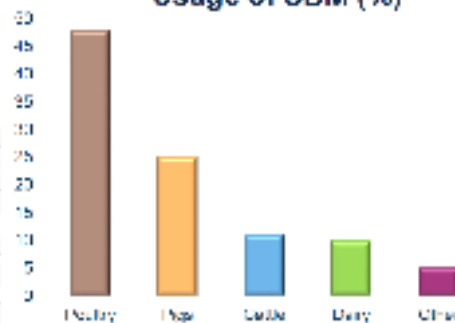

Locally Rooted, Globally Respected

www.ugm.ac.id

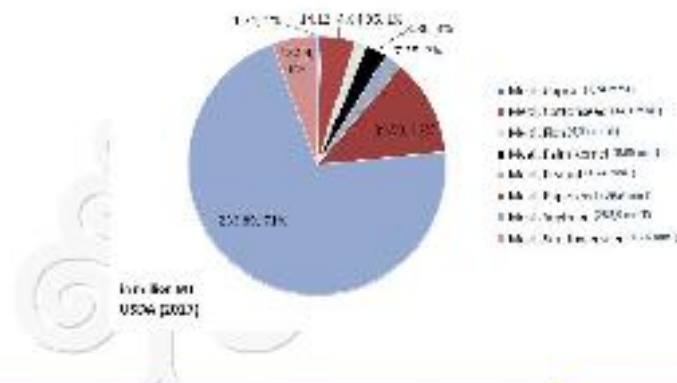

Usage of SBM (%)

Locally Rooted, Globally Respected

www.ugm.ac.id

World protein meal consumption (2017)

Locally Sourced, Globally Respected www.ugm.ac.id

Processing of Oilseeds

Locally Sourced, Globally Respected www.ugm.ac.id

Facts & Challenges :

- Competition : food - feed – fuel ?
- Feed and feed ingredients shortage ?
- Feed quality, feed availability, feed cost ?

Position of Indonesia ?

Locally Sourced, Globally Respected www.ugm.ac.id

Consumers Want Their Meat "Free" Across the Globe!
And They Want Adjectives Added and Not Additives Added!

- Antibiotic-free
- Hormone-free
- Additive-free
- Campylobacter-free
- Salmonella-free
- E.coli-free
- GMO-free
- Free-range
- Gluten-free

antibiotic-free
chicken

GLUTEN-FREE
CHICKEN NUGGETS

Excessive utilization of Antibiotic and Growth Promoter (AGP) in animal farming stimulates bacterial resistance, and AGP residue in the animal products (meat, milk, egg) is harmful for the human health because bacteria resistance.

Data O'Neill Commission (2016): 700,000 people died because microbial resistance.

Food and Agriculture Organization (FAO), agriculture uses antibiotic 65,000 - 240,000 ton per year.

EU has banned the utilization of AGP in animal farming since 2006 (Indonesia start from 2018).

More consumer has aware on the issue of food quality and food safety.

Locally Raised, Globally Respected www.ozp.co.id

Without ANTIBIOTIC

- Food-borne zoonotic diseases
- Economic Impact

With ANTIBIOTIC

- Bioreistance
- Higher medical cost
- Increased mortality

Locally Raised, Globally Respected www.ozp.co.id

Re-orientation of feed & ingredients development programs

Locally Sourced, Globally Respected www.ugm.ac.id

Goal of animal nutrition

Locally Sourced, Globally Respected www.ugm.ac.id

Three Main Areas of Nutrition

- What we feed to the animals
 - Nutrient composition of ingredients
- What happens in the GI-tract
 - Digestion, absorption, excretion
- What happens in the rest of the body
 - metabolism, synthesis, deposition, and excretion of excesses

Locally Sourced, Globally Respected www.ugm.ac.id

1

Feed Technology

- 1. Increase Feed intake*
- 2. Improve Digestibility*
- 3. Improve Nutrients Absorption*
- 4. Balance nutrients*
- 5. Supplement & Additive*

Locally Rooted, Globally Respected

www.ujg.ac.id

2

Local Feed Ingredients

- 1. Corn*
- 2. Copra & Palm kernel meal*
- 3. Protein leaf meal*
- 4. Herbal's feed additive*

Locally Rooted, Globally Respected

www.ujg.ac.id

3

Multifunctional Feed Additive & Essential oils

Locally Rooted, Globally Respected

www.ujg.ac.id

Livestock farming system based on the nature for healthier animal products and human health

Indonesia is rich in biodiversity, quality and rich in natural resources including herbs. Exploiting herbs and other plants for its naturally essential oil is much of interest as **feed additive** for livestock farming.

Research Roadmap

(Ali Agus, 2016 - 2021)

Locally Rooted, Globally Respected

www.ugm.ac.id

Multifunctional Feed Additive

Definition :

Feed additive consisting of several ingredients or active substances mixture, required essentially by the animal for better health and optimal production (trace mineral, vitamin, amino acid, probiotic, prebiotic, phytobiotic, essential fatty acids,...)

Role :

- Source of mineral and trace minerals
- Source of vitamins
- Antioxidant
- Immuno stimulator
- Balance microbe in the gut

Locally Rooted, Globally Respected

www.ugm.ac.id

Remarks & Take home messages :

1. Animal production face the problem on the productivity, safety and sustainability
2. Challenges in feed quality, feed availability and feed cost (global and national)
3. Local feed ingredients need to be developed & promoted (corn, copra & palm kernel meal, protein, leaf, herbs)
4. Development of multifunctional feed additive based on local resources has the opportunities and challenges, and it seems to be promising
